QUARTERLY ACTIVITIES REPORT – 3 MONTHS ENDED 30 JUNE 2016

Ikwezi Mining Limited (ASX: IKW, Ikwezi Mining or Company).

Thermal coal markets

Thermal coal prices showed an improvement during the quarter ended 30 June 2016 aided by some supply side rationalisation. The API 4 index (basis FOB Richards Bay for 6000 NAR material) increased during the quarter, with the previous declining forward price curve flattening. At the date of this report the API4 index is trading at approx. USD63 with the 2017 forward market at similar levels.

The South African Rand remained in a tight range versus the US Dollar during the quarter, and closed the quarter at nearly the same levels as at the end of the previous quarter. This coupled with an increase in coal prices in dollar terms has improved prospects of coal exports from South Africa.

Finance update

The Company had cash and cash equivalents of A\$2.091 million at 30 June 2016 (A\$2.383 million at 31 March 2016).

Update on status of project implementation

With the improved market conditions, the Company is looking to bring the “Central opencast” area of Ntendeka colliery into production selling run of mine (ROM) coal initially.

The Company is in the process of finalising its preferred mining contractor. Once this has been completed, a final decision will be made by the Board on the start-up of mining operations. In line with this we expect to appoint the mining contractor and start implementing the capital expenditure plan to start run-of-mine. Mining operations are targeted for commencement in the first quarter of calendar year 2017. In parallel, the Company will conclude discussions with identified potential off takers for the product.

Ikwezi Mining Limited (incorporated in Bermuda with registered company number 45349)
ARBN 151 258 221
Clarendon House
2 Church Street
Hamilton
HMCX Bermuda

The Company continues to minimise its overheads and cost structure.

The Company has elected to allow its Acorn Project's Prospecting license to lapse given its current focus on minimising expenditure and bringing its Ntendeka colliery into production.

No further geological or mine planning work was undertaken during the quarter ended 30 June 2016 on the remainder of the resource.

Summary

Whilst the API index range is below the \$70 to \$75 range prevailing when Ikwezi undertook the rights issue in early 2015 with the intention of commencing the mining and sale of ROM coal, management are of the view that the mine can operate profitably in the current market conditions. Accordingly, the mining operations are targeted for commencement in the first quarter of calendar year 2017, and the Company is also working towards minimising risks that could potentially affect start of production.

ABOUT IKWEZI

Ikwezi Mining Ltd is focused on the exploration and development of coal projects in South Africa. Ikwezi has a 70% stake in the Ntendeka Colliery and a 60% interest in the Assegai project. The Ntendeka Colliery is located in the KwaZulu-Natal coal fields and is in close proximity to rail and port infrastructure.
