QUARTERLY ACTIVITIES REPORT – 3 MONTHS ENDED 30 SEPTEMBER 2021

Ikwezi Mining Limited (ASX: IKW, Ikwezi Mining or Company).

Operational update

The current quarter saw the company improving its coal production, as previously coal production was delayed on account of additional waste stripping due to high stock levels and low product pricing. This has led to a record ROM coal production of 92,851 tonnes in July. This has been the highest monthly production since the company's commencement of mining operations in 2018.

Significant progress is being made to improve production at the Emoyeni wash plant, a total feed of 210 285 tonnes was achieved for the quarter. This has also been the highest quarterly production rate since commencement of operations in December 2020.

Finance update

Cash and cash equivalents of the Company as at 30 September 2021 totalled A\$ 0.453 million (30 June 2021: A\$ 0.214 million), together with undrawn finance facilities in the amount of A\$ 1.825 million.

No expenditure was incurred on exploration or development activities during the quarter. The expenditure of A\$ 4.7 million was incurred on mining production activities during the quarter.

Thermal coal markets

Thermal coal prices (API4 Richards Bay - FOB Richards Bay for 6,000 kcal, NAR product) continued to increase during the current quarter. Prices have touched record high levels in October at over USD 200, these prices have been driven by coal shortages in China, India and Europe. Prices are expected to be strong until December 2022 whereafter the API4 forward curve predicts a gradual decline over the next 12 months.

Future Developments

The Company, through its Emoyeni wash plant aims to ramp up its throughput to achieve 75 000 tonnes on a monthly basis in the coming quarter. Further, we plan to bring the Goedehoep pit into production in the coming quarter.

Summary

Key management focus in the short term remains on value addition, margin expansion and self sufficiency through production expansion of ROM and washed coal.

The Company's Appendix 5B includes amounts in item 6.1, being related party payments. The amount represents payments made to Zarbon Coal (Pty) Ltd (related party) for fees charged relating to the export of coal.

ABOUT IKWEZI

Ikwezi Mining is a visionary mining company operating in the KwaZulu Natal province of South Africa. We operate the Kliprand Colliery, the Emoyeni coal beneficiation plant in Dannhauser, Kwa-Zulu Natal and utilize the Ikwezi Ngagane rail siding near the Ngagane power station in Newcastle. Ikwezi Mining Limited is focused on the exploration and development of coal projects in South Africa. The Newcastle Project consists of a number of open cast and underground areas each with different access, different land ownership and different community groupings. Over the life of the mine, each of the opencast and underground areas will be mined separately although they will all share a common infrastructure and processing facility. The Kliprand Colliery is the initial open cast area within the Newcastle Project where mining operations commenced in May 2018. Ikwezi has a 70% stake in the mining right area located in the province of KwaZulu-Natal and is in close proximity to rail and port infrastructure.
